SPACE[®]
AUTO DOOR

SPACE in brief

SPACE supplied its first automatic sliding door in 1999 and it quickly moved on to become the acknowledged China market leader for automatic sliding doors. We strive for perfect solutions in applications in different markets and aim to be the best in terms of innovation and reliability. Those who know us and cooperate with us know the high standards we apply to our work.

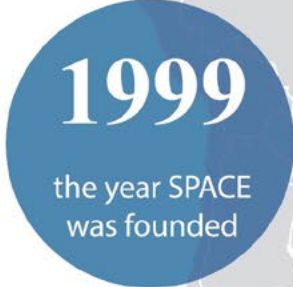

STRONG INTERNATIONAL FOCUS

With export accounting for 65% of the 2012 consolidated turnover, SPACE is expanding its presence in the world's main countries, with a product range that successfully combine technology, ease of use and design.

The company products are sold in about 30 countries in the world, covering different geographical areas - extending from China to other Asian countries, to countries in Eastern and Western Europe, United States, the Middle East, South America and Africa.

SATISFIED CUSTOMERS IN ALL MARKETS

Every year we carry out a surveys of customer satisfaction, to establish the needs and wants of our customers in different markets. Based on these results we either adjust our products or tailor made products to suit these individual markets.

A light gray world map is the background. Four dark blue circular callouts are overlaid on the map. The largest callout is in the bottom left, covering Africa and Europe. Another is in the top left, covering Europe and Asia. A third is in the middle right, covering Japan and South Korea. The fourth is in the bottom right, covering China. The callouts contain white text with large numbers and smaller descriptive text.

38

total number of countries to which we export.

5

total branches in Japan and South Korea

22

branches across China

94,000

automatic door operators sold worldwide since founding of SPACE.

Who we are

SPACE is one of the most successful providers of automatic door systems in Asia and is increasingly becoming a larger player on the international market as well.

SPACE motto

Let us open the doors to your success.

SPACE systems

System for every application. They open quickly, safely and quietly, and meet high standards of functionality and design.

SPACE quality

High product quality is one of the assets that allow us to distinguish ourselves from our competitors.

Our Aim

To produce products that defy preconceptions and transform the idea of excellence at balanced price

Facebook

The SPACE fan page is a platform enabling all those with interest in SPACE to interact with each other and with SPACE

Our commitments we aim to produce products that defy preconceptions and transforms the idea of quality at balanced price; to constantly refine, improve, break new ground and to offer our customers only the very best.

What we do

SPACE is committed to study of new manufacturing solutions and processes which enable it to implement innovative designs and superior manufacturing processes with the ecological use of material and energy. The knowledge accumulated from this allows us to develop competitively priced automatic door mechanisms with the necessary qualities which are expected of any automatic door mechanism plus further intelligence, reliability and economy of use. We provide architects, planners, processors and retailers with an unrivalled range of entrance solutions and architectural hardware at prices and quality that are unmatched by our competitors. In future, we aim to bring numerous new products and innovations into the market, which will not just improve our company's growth, but also improve the lives of our consumers.

What we stand for

Our approach is built on developing long lasting relationships. We aim to earn respect with our customers by being consistent in delivering high quality and reliable products. In order to achieve this, we have put in place strong foundations, which begin with our mission statement. Our mission "To produce products that defy preconceptions and transform the idea of excellence at balanced price" is the basis for the values and rules that SPACE is committed to follow. We have set out five values which express our shared understanding of what we believe, how we aim to achieve success and what we aspire to be as an organization. We are very clear that to deliver sustained quality and reliability and to maintain long lasting relationships, we need to be able to understand 'how' we can deliver excellent products at balanced price. Our values are a core part of the 'how'. They are clearly stated and brought to life by employees every day.

Our values We have established strong foundations to make SPACE consistent in delivering high quality and reliable products.

Technology

Development and application of technology represents an opportunity that is central to our image and competitive advantage. We are focused on developing technology that is expected to deliver the most promising long term results.

Quality

We constantly aim to earn our customers' trust by providing dependable products and services, fast deliveries, and reliable support. We promote a culture of innovation and responsibility that ensures our quality management systems is continuously evolving to meet our customers' highest requirements.

Innovation

We aim to promote and sustain growth through innovative enterprise. Through developing innovative technologies centering on the field of automation, we create products that contribute to safer, more comfortable and enhanced entrance for our customers. .

People

At SPACE, we facilitate knowledge building and knowledge sharing. We encourage our workforce to, not only work consistently and accurately, but to acquire knowledge about the work that they do, so that they may better understand how to ensure that the products are manufactured according to our company's standards.

Customers

We put customers first and strive to provide the highest level of value and satisfaction. We are committed to quality, innovation and continual improvement in the products, solutions and services that we offer customers. Our customers' is critical to our process and the quality we provide.
